7 – INSERTS

1 - OBJETIVO

Criação de um banco de dados para servir como base das informações de um sistema educacional online, o Instrue. A fim de controlar os níveis acessos, transações e disponibilização de cursos de uma aplicação web.

2 - REQUISITOS E REGRAS DE NEGÓCIO

O sistema Instrue armazenar dados para a disponibilização de seus usuários, que podem ser instrutores ou alunos, usuários possuem nome, login, e-mail, status, senha, e uma foto. Instrutores e alunos podem estar vinculados a vários cursos. Para instrutores é necessário armazenar seu documento de identificação, aos alunos deseja-se armazenar a matrícula.

Cursos podem ser ministrados por mais de um professor, deseja-se manter o título, status, thumbnail, preço, duração e sua descrição, os cursos possuem módulos que dividem seu conteúdo, os módulos possuem título, descrição, thumbnail, duração, cada modulo pertence exclusivamente a um curso pode possuir diversas aulas, sendo assim, aula possui título, um link para o vídeo, conteúdo e uma descrição. Os alunos podem ter acesso aos anexos disponíveis em cada aula, que são guardados título, comentário e link de acesso do anexo.

Para que os alunos participem dos cursos, é necessário que ele realize a compra do curso, que são registrado os dados do aluno, os itens que estão vinculados a compra, preço e a data onde deve ser possível utilizar como histórico de variação de preço ao longo do tempo, forma de pagamento que deverá ser validado entre CREDITO, DEBITO, BOLETO ou DEPÓSITO, durante a compra é possível relacionar um ou mais itens disponíveis. A compra possibilita o pagamento através de parcelas, onde possuem valor, data e status, a quantidade de parcelas geradas não deve ultrapassar a quantidade 12. Ainda é possível o aluno avaliar o curso para posicionar sua reputação onde é gerado um comparativo entre todos os cursos sobre sua avaliação média.
